### Profile

Builds real-time browser UIs: a framework-free, schema-driven phone control panel for live visuals (vanilla JavaScript, WebSocket) and my React + TypeScript portfolio site with an audio-reactive three.js background. Front-end experience from Digiteq Automotive's HMI team (2023); 3D artist there since 2023. Code written with AI coding agents under my direction.

### Experience

**3D Artist** — Digiteq Automotive, Virtual Reality Lab — 2023 – now

- Game-asset creation: modelling, texturing, optimisation
- Preparing optimised assets for 3D simulations in VR

**Independent real-time & audio-reactive work** — Self-directed — ongoing

- Phone web control panel for TouchDesigner visuals: vanilla JavaScript, WebSocket, no build step
- Bilingual React 19 + TypeScript portfolio site with a static page per route (Vite, Tailwind CSS)
- TouchDesigner GLSL visualizers and Unreal Engine 5 real-time scenes (C++, HLSL)
- Concept, UX direction and development lead; code written with AI coding agents under my direction

**HMI Front-end Developer** — Digiteq Automotive, DTF-D — 2023

- HMI skinning
- UI installation for Škoda, debugging and testing

**3D Artist (internship)** — Cinesco — Jun – Sep 2023

Game-asset design, modelling and sculpting

**Market Researcher** — Copy General Technologies — 2022

Research of the Czech market and 3D-print technologies; 3D modelling, consulting, customer service

**Printing Operator, junior → senior** — Copy General — 2019 – 2022

Typography design services and their sale; order fulfilment, email and phone communication

### Selected projects

- **AV Control** — Dependency-free phone VJ panel (~3,100 lines, no build step) that builds 255 controls from a TouchDesigner schema and stays in sync over one WebSocket. JavaScript, HTML/CSS, WebSocket, Canvas · Case study
- **Portfolio HQ** *(ongoing)* — My bilingual portfolio site: shareable ?for= role links, a static page per route, a Web Audio-driven three.js background, Lighthouse accessibility and SEO at 100. TypeScript, React, Vite, Tailwind · Case study
- **AudioVisualizer** — 18 GLSL worlds steered live from a vanilla-JS phone panel: two-way WebSocket sync with echo suppression, live preview stream, MIDI learn. JavaScript, WebSocket, GLSL, TouchDesigner · Case study
- **Perspectiva** — Real-time GLSL music visual: a raymarched SDF hall at 1080×1920 measured at 60 fps (p95 17.2 ms), 529-operator network generated from Python. GLSL, Python, TouchDesigner · Case study

### Skills

**Web:** TypeScript, React, Vite, Tailwind CSS, JavaScript, HTML & CSS (responsive layouts, ARIA, prefers-reduced-motion), WebSocket, Canvas 2D, Three.js, Web Audio
**Real-time UI:** schema-driven controls, throttled sends, echo suppression, reconnect with backoff, mock backends, unit tests
**Graphics:** GLSL, HLSL, TouchDesigner, Unreal Engine 5, Blender
**Languages:** Python, C++
**Design:** Figma, Photoshop
**AI-assisted development:** directing AI coding agents that write the code while owning concept, UX direction, testing and review
**Soft skills:** teamwork, communication, creativity, management, presentation, organisation

### Education

**Secondary School of Glassmaking** — Kamenický Šenov · glass cutting and engraving; design concepts — 2018 – 2019
