Profile

Ships working software with AI coding agents: I set the goals, design and checks, agents such as Claude Code write the code, and I review, test and sign off. Web apps, API integrations and automation via git and the terminal: my React + TypeScript portfolio, a WebSocket phone app, Python CLIs. HMI front-end experience at Digiteq Automotive (2023).

Experience

3D Artist — Digiteq Automotive, Virtual Reality Lab — 2023 – now

- Game-asset creation: modelling, texturing, optimisation
- Preparing optimised assets for 3D simulations in VR

Independent projects: web, automation, real-time — Self-directed — ongoing

- Web: my React 19 + TypeScript portfolio and a WebSocket phone panel in vanilla JavaScript
- Automation: Python CLI pipelines driving ComfyUI over HTTP, headless Blender, Unreal Engine 5 and FFmpeg
- Unreal Engine 5 live VJ engine in C++ and HLSL with scripted frame-time self-tests
- Goals, system design, test criteria, review and sign-off; code written with AI coding agents under my direction

HMI Front-end Developer — Digiteq Automotive, DTF-D — 2023

- HMI skinning
- UI installation for Škoda, debugging and testing

3D Artist (internship) — Cinesco — Jun – Sep 2023

Game-asset design, modelling and sculpting

Market Researcher — Copy General Technologies — 2022

Research of the Czech market and 3D-print technologies; 3D modelling, consulting, customer service

Printing Operator, junior → senior — Copy General — 2019 – 2022

Typography design services and their sale; order fulfilment, email and phone communication

Selected projects

- **Portfolio HQ** *(ongoing)* — Bilingual portfolio site, coded by Claude Code under my direction: shareable ?for= role links, a static page per route, one-command git deploy, bundle 199 → ~158 KB gzip. TypeScript, React, Vite · Case study
- **AV Control** — Phone web app: 255 controls built from a TouchDesigner schema, JSON state and JPEG frames over one WebSocket; tested against a Python mock server, 116 MIDI unit tests. JavaScript, WebSocket, Python · Case study
- **AudioVJ** *(ongoing)* — ~56k-line UE5 C++ app; self-tests log fps, GPU ms and pass/fail gates to report.json, and a GPU crash fix was confirmed by 73 clean live switches. UE5, C++, HLSL, Python · Case study
- **ai3d Forge** *(ongoing)* — Python CLI with 23 re-runnable stages driving ComfyUI over HTTP, headless Blender and Unreal: from a text prompt to a rigged, game-ready UE5 character. Python, ComfyUI, Blender, UE5 · Case study

Skills

Web: TypeScript, React, Vite, Tailwind CSS, JavaScript, HTML & CSS, WebSocket, HTTP/JSON APIs, three.js

AI-assisted development: Claude Code; directing AI coding agents that write the code while owning goals, system design, test criteria, review and sign-off; multi-agent review passes; MCP

Testing: typecheck and production build as a gate, Lighthouse, visual checks at phone width, mock servers, unit tests, scripted self-tests, pre-publish leak scans

Tooling: Git & GitHub CLI, terminal (PowerShell, Bash), Python automation, FFmpeg, headless Chrome

Hands-on experience: Next.js; PostgreSQL, Prisma, Supabase; ad platform APIs (Google Ads, Meta, Sklik); scraping

Languages & engines: Python, C++, HLSL, GLSL; Unreal Engine 5, TouchDesigner, Blender

Soft skills: teamwork, communication, creativity, management, presentation, organisation

Education

Secondary School of Glassmaking — Kamenický Šenov · glass cutting and engraving; design concepts — 2018 – 2019
